

We are pleased to inform you that **eProfiler Solutions Malaysia Sdn Bhd** as offered an internship opportunity to highly motivated and enthusiastic UM students. For more details, please refer below:

Internship Duration & Location:

Internship Position :

### Junior Research Intern

Duration: 6 Month (Start date is flexible according to university requirements)

Location: Department of Physics University Malaya

Company Website: <http://www.eprofilersolutions.co.uk>

eProfiler Solutions is an exciting startup at the point of launch, offering a SaaS platform in the Scientific Research industry. The company has built a cloud platform on Amazon Web Services that processes test results from a growing series of measurement devices using proprietary PCB-based sensors. The ePID (eProfiler Identification and Detection) Cloud Platform is central to the company's operations, facilitating the tracking of customer devices and sensors, processing and analysis of test results, and maintaining a library of electronic profiles for various materials..

Student Requirements:

- Bachelor's degree in Molecular Biology, Biochemistry, Biotechnology, or a related field.
- Experience in routine laboratory procedures, including material preparation, handling and waste management.
- Need to conduct an internship for a minimum of 6 months.
- Strong organisational skills and attention to detail in maintaining lab records and inventory.
- Ability to work independently and collaboratively in a research-focused environment.
- Willingness to learn and develop skills in electronic and electrochemical characterisation techniques.
- Familiarity with laboratory safety regulations and best practices.

Interested candidates may submit a resume, cover letter, and academic transcripts via email to [gausalyassravi@gmail.com](mailto:gausalyassravi@gmail.com)
