

## **Position: Software Engineer Intern**

Internship Duration: 3 to 6 months

Employment Type: Internship

Eligibility: Malaysian citizens or those with relevant residence status

## About the Role

Are you someone who **enjoys writing code and building real solutions**? We're looking for a passionate **Software Engineer Intern** who loves programming and wants to sharpen their skills by working on actual projects alongside experienced professionals. This internship is ideal for students or fresh graduates who are eager to turn their coding interest into a solid foundation for a tech career.

## **Responsibilities:**

- Assist in developing, maintaining, and testing real-world software applications.
- Collaborate on client-specific solutions and in-house product enhancements.
- Participate in requirement analysis and support solution design efforts.
- Contribute to technical documentation and system walkthroughs.
- Join in team discussions and brainstorming sessions.
- Learn and apply new tools and programming frameworks as part of development tasks.
- Approach problems logically, and take pride in writing clean, efficient code.

### **Requirements:**

- Currently pursuing or recently completed a **Diploma or Bachelor's Degree** in Computer Science, Information Technology, or a related field.
- Genuine interest in programming and solving real-world problems through code.
- Basic knowledge of software development, ideally on the Microsoft platform.
- Exposure to ASP.NET, C#, and SQL is a plus (but not mandatory).
- Interest in mobile app development (Android/iOS), RPA, or AI is an added advantage.
- Strong communication skills in English (written/spoken).
- Curious, eager to learn, and comfortable working in a team.

# What You'll Gain:

- Hands-on experience with production-level software projects.
- Mentorship from experienced software engineers.
- Exposure to professional development practices and tools.
- A potential pathway to full-time employment based on performance.
- A collaborative, supportive environment that values learning and initiative.
- Opportunities to learn and work with Robotic Process Automation (RPA) tools and AI Agent technologies, contributing to real projects involving automation and intelligent systems.

Interested candidates are invited to submit their resume or CV to hr@adamas.my.
