

KICKSTART YOUR CAREER WITH THE RIGHT INTERNSHIP COME JOIN US!

CYBERSECURITY

ROLE DESCRIPTION

This internship supports the CFC by assisting in developing cybersecurity knowledge assets, governance documentation, and foundational materials. The role focuses on providing exposure to cybersecurity operations and threat management.

- Duration: 4-6 months (aligned to university and internship program intake timelines)
- Working Model: Onsite (subject to company discretion)
- Conversion: No implied conversion to permanent role; future opportunities subject to performance and availability at the end of the program.
- Develop and maintain cybersecurity knowledge base content using approved documentation platforms
- Perform guided research on cybersecurity governance, fusion center models, and security operations concepts
- Document operating principles, workflows, role definitions, and governance artifacts
- Apply standardized templates, taxonomy, and version control practices
- Review and improve documentation clarity, accuracy, and consistency
- Maintain traceability between decisions, references, and supporting materials

ROLE REQUIREMENTS

- Current undergraduate student or recent graduate in Cybersecurity, Information Technology, Computer Science, Information Systems, or related disciplines
- Strong command of the English language and structured documentation skills
- Ability to synthesize complex technical concepts into clear written artifacts
- Basic understanding and conceptual knowledge of IT and Cybersecurity domains and terminology
- Strong attention to detail and research discipline
- Preferred:
 - Familiarity with documentation platforms (Confluence, SharePoint, Notion, Markdown)
 - Awareness of cybersecurity frameworks (NIST, ISO/IEC 27001, MITRE ATT&CK) at a conceptual level
 - Prior academic or project experience involving technical documentation or research
- Competency:
 - Analytical thinking
 - Written communication excellence
 - Professional discipline and confidentiality
 - Ability to work with abstract or evolving requirements
 - Willingness to validate sources and challenge unclear inputs constructively

DRIVING BUSINESS GROWTH THROUGH TECHNOLOGY

ABOUT US

Wilmar International Limited, founded in 1991 and headquartered in Singapore, is Asia's leading agribusiness group. It is consistently ranked among the largest companies listed on the Singapore Exchange by market capitalization.

Wilmar operates across an integrated value chain that includes oil palm cultivation, oilseed crushing, edible oils refining, flour and rice milling, and sugar processing. Its portfolio also extends to consumer products, ready-to-eat meals, specialty fats, oleochemicals, biodiesel, fertilizers, and food park operations.

Wilmar has over 500 manufacturing plants supported by a workforce of approximately 100,000 employees. Its extensive distribution network spans China, India, Indonesia, and more than 50 countries. The group generated revenue of USD 67.38 billion and is ranked 200th in the Fortune 500, with a strong commitment to sustainability across its operations and supply chain.

Wilmar Consultancy Services (WCS), established in 2010 and wholly owned by Wilmar International, is the IT consulting and digital transformation arm of Wilmar International. It was established to support Wilmar's global operations by delivering end-to-end technology solutions. WCS plays a critical role in enabling Wilmar's digitalization journey across its diverse business units.

Beyond supporting internal operations, WCS also extends its expertise externally by offering SAP and IT consulting services to clients. Leveraging deep industry knowledge and hands-on experience within Wilmar, WCS delivers practical, scalable, and business-driven solutions.

WHY JOIN US

- Wilmar has worldwide presence, with coverage over 50 countries. There is no limit to where our people can take their careers.
- Wilmar employees have opportunity to learn and develop, to grow and perform to their fullest potential. They work in an environment that values their ideas, teamwork and personal safety.
- Our employees learning and development program includes cross country projects, structured job rotation, overseas assignment and international posting.
